JOURNAL OF COMPUTATIONAL AND APPLIED MATHEMATICS

Author Index to Volume 54 (1994)

(The issue number is given in front of the page numbers.)

Baker Jr, G.A. and **P.R. Graves-Morris,** Existence of certain sequences of Hermite–Padé approximants (1) 45– 49

Busby, R.C. and **W. Fair,** Quadratic operator equations and periodic operator continued fractions (3) 377–387

Chen, Y., M.E.H. Ismail and **K.A. Muttalib,** Asymptotics of basic Bessel functions and q-Laguerre polynomials (3) 263–272

Christiansen, S. and **P.C. Hansen,** The effective condition number applied to error analysis of certain boundary collocation methods (1) 15– 36

Chronopoulos, A.T., On the squared unsymmetric Lanczos method (1) 65– 78

Cope, D.K., Characterization of first-order convergent sequences (1) 51– 63

ElMennaoui, O., Asymptotic behaviour of integrated semigroups (3) 351–369

Everitt, W.N. and **C. Markett,** On a generalization of Bessel functions satisfying higher-order differential equations (3) 325–349

Ezzat, M.A., Power-law fluid flow of a hydromagnetic free jet (1) 37– 43

Fair, W., see **Busby, R.C.** (3) 377–387

Graves-Morris, P.R., see **Baker Jr, G.A.** (1) 45– 49

Hamböker, R., Convergence rates for stopped random sums (2) 159–184

Hansen, P.C., see **Christiansen, S.** (1) 15– 36

He, M., The Faber polynomials for m-fold symmetric domains (3) 313–324

Hugger, J., An asymptotically exact, pointwise, a posteriori error estimator for linear, elliptic, one-dimensional problems with possible singularities in the solution (2) 185–220

Huotari, R., see **Marano, M.** (2) 151–157

Hussein, H.A., An explicit solution of third-order difference equations (3) 307–311

Ismail, M.E.H., see **Chen, Y.** (3) 263–272

Jiang, T., Asymptotic expansion for the approximation of the Lipschitz function by the Hermite–Fejer interpolation polynomial (3) 285–296

Kölbig, K.S., On three trigonometric integrals of $\ln \Gamma(x)$ or its derivative (*Letter*) (1) 129–131

Lambert, D. and **A. Ronveaux,** Hurwitz problem, harmonic morphisms and generalized Hadamard matrices (3) 273–283

Marano, M. and **R. Huotari,** The Pólya algorithm on tubular sets (2) 151–157

Markett, C., see **Everitt, W.N.** (3) 325–349

Meek, D.S., see **Walton, D.J.** (1) 107–120

Muttalib, K.A., see **Chen, Y.** (3) 263–272

Nees, M., Approximative versions of Kolmogorov's superposition theorem, proved constructively (2) 239–250

Nguyen huu Cong, A parallel DIRK method for stiff initial-value problems (*Letter*) (1) 121–127

Ohe, T. and **K. Ohnaka,** Determination of locations of point-like masses in an inverse source problem of the Poisson equation (2) 251–261

Ohnaka, K., see **Ohe, T.** (2) 251–261

Pan, K., On the convergence of the rational interpolation approximant of Carathéodory functions (3) 371–376

Rathore, R.K.S., Total error in the discrete convolution backprojection algorithm in computerized tomography (1) 79– 97

Ronveaux, A., see **Lambert, D.** (3) 273–283

Schott, D., About geometrical convergence of general iterative methods applied to nonunique solvable convex problems, Part I (1) 1– 14

Schott, D., About geometrical convergence of general iterative methods applied to nonunique solvable convex problems, Part II (2) 133–150

Shalaby, M.A., A parallel processed scheme for the eigenproblem of positive definite matrices (1) 99–106

Singer, P., An integrated fractional Fourier transform (2) 221–237

Walton, D.J. and **D.S. Meek,** Approximation of quadratic Bézier curves by arc splines (1) 107–120

Žitňan, P., The Rayleigh–Ritz method still competitive (3) 297–306
